TRAFFIC ENGINEERING & CONTROL
INDEX TO VOLUME 19
January 1978 – December 1978

	Month.Page
Accuracy of traffic flow models, The—A review and preliminary investigation. *A. Ceder*	12.541
Analysis of problems in the interface between urban motorways and urban traffic control. *S. Y. D. Lo and L. G. Willumsen*	12.550
Basic Network, The: a flexible system for calculating travel times and travel distances. *K. Batenburg and H. Luikens*	7.346
Blackwater Valley bus rationalisation study. *A. A. B. Mills and T. P. Lacey*	6.262
Bus passenger O–D surveys using the seat matrix method. *P. Davies and J. J. Gribble*	12.559
Capacity of roundabouts, The. *M. McDonald and D. J. Armitage*	10.447
Carriageway edgelining and the effects on road safety. *D. B. Charnock and B. A. C. Chessell*	1.4
Comparison of observed and estimated queue lengths at oversaturated traffic signals, A. *D. Branston*	7.322
Comparative traffic behaviour. *S. Teply*	12.569
Conference and symposium reports:	
4th Australian Transport Research Forum, Perth, W. Australia, May 24–26. *M. R. Wigan*	10.466
Automated guideway transit technology development, U.S. Department of Transportation's Systems Centre conference, Boston, February 28–March 2. *R. C. Baker*	6.293
Designing public transport, Ninth Newcastle Symposium, University of Newcastle upon Tyne, April 4–6. *H. E. Gault*	6.292
Public transport systems in urban areas conference, Gothenburg, Sweden, June 27–30. *R. Barrett*	8/9.409
Regional Highway Traffic Model, The, Colloquium and PTRC Summer Annual Meeting, University of Warwick, July 11. *H. Kirby*	8/9.408
Universities Transport Studies Group: Report of 10th Conference, City University, London, January 4–6. *J. D. Bolland and J. D. Ortuzar*	3.143
Development of a microprocessor-based vehicle classifier, The. *M. J. Dalgleish and R. D. Tuthill*	3.116
Digital system for urban traffic flow data, A. *J. B. Garner and J. Uren*	8/9.389
Effect of car ownership and income on bus travel, The. *P. H. Bly and R. H. Oldfield*	8/9.392
Effect of traffic signals on road accidents—with special reference to the introduction of a blinking green phase. *A. S. Hakkert and D. Mahalel*	5.212
Effects of mandatory school-entrance markings, The. *D. J. Brownfield*	2.79
Effects of motorcyclists' high-visibility aids on driver gap acceptance. *C. Kirkby and P. G. Stroud*	8/9.401
Empirical comparison of zonal, household and personal models of home-based trip generation, An. *E. I. Pas*	2.64
Facilities for vehicle breakdowns: their effects at roadworks on dual carriageways. *A. D. Maclean*	1.8
Freight planning in London. *B. B. Hasell, M. F. Foulkes and J. J. S. Robertson*	
1. The existing system and its problems	2.60
2. Assisting efficient freight operation	3.126
3. Reducing the environmental impact	4.182
4. The total strategy	5.231
Freight transport in St Helens: the value of road improvements. *A. Wooltorton and M. White*	7.343
Greater London 'Ride-Bright' Campaign—its effect on motorcyclist conspicuity and casualties, The. *N. Lalani and E. J. Holden*	8/9.404
Hong Kong Island Corridor Study, The. *J. K. Steer and I. D. H. Harris*	8/9.372
Hull Freight Study, The. *R. S. Bartlett and A. W. Christie*	11.498
Intensity of car use in Oxford. *P. B. Goodwin*	11.514
Is Leitch on the right track? *M. J. H. Mogridge*	2.88
Justification for bus lanes in urban areas. *P. H. Bly, F. V. Webster and R. H. Oldfield*	2.56
Keep-Left staggered Pelican crossings at Newcastle-under-Lyme and Nuneaton. *F. S. Alexander*	7.336
Learning to manage transport systems. *J. D. Ortuzar and L. G. Willumsen*	5.236
Mathematical modelling—the error of our ways. *J. Robbins*	1.32
Measuring the lateral position of vehicles on the road: system and preliminary results. *H. Summala and A. Merisalo*	7.328
Method of verifying the effectiveness of limited parking zones, A. *H. Knoflacher*	2.82
Micro-Master: the co-ordination of small groups of intersections. *I. F. Turner and G. F. Shannon*	4.171
Microprocessors: A discussion in the context of transport control. *J. B. Evans*	3.112
Model of household car ownership. A. *J. Bates, H. Gunn and M. Roberts.* Part 1	11.486
Part 2	12.562
Modelling of temporary residents in South-East Dorset. *B. R. Machin, C. Francombe, R. H. Williamson and R. S. Burton*	11.492
Models of gap acceptance by queues at intersections. *D. F. Cooper and J. Wennell*	4.178
Monitoring study of rail commuting on Merseyside: 1974–1976, A. *D. Maltby, K. A. Lawler and I. G. Monteath*	6.278
Multi-purpose portable data collection system, A. *A. Polus, M. Livneh and S. Borovsky*	3.123
New look at Davidson's travel time function, A. *R. Akcelik*	10.459
Note on further developments with program Trafficq, A. *D. M. W. Logie*	3.115
Note on motoring expenditure shortly before and after the oil crisis of 1973/74, A. *G. Charlesworth*	10.463
Optimal control of oversaturated intersections—theoretical and practical considerations. *P. G. Michalopoulos and G. Stephanopoulos*	5.216
Peak-period traffic delays at road junctions and other bottlenecks. *R. M. Kimber and E. M. Hollis*	10.442
Platoon dispersion along a major road in Sheffield. *T. Y. El-Reedy and R. Ashworth*	4.186
Public transport passenger surveys. *G. I. Watson*	6.268
Research at the Centre for Transport Studies, Cranfield Institute of Technology. *P. R. Oxley*	11.518
Results of surveys in Oxford to investigate the impact of bus lane schemes. *D. B. Papoulias and M. C. Dix*	1.26

	Month.Page
Role of Structure Plans and Local Plans in transport planning, The. *A. W. McMillen*	6.294
Rufbus, Retax and Bustaxi: three European systems of demand-activated public transport. *M. W. K. A. Breur and W. Verdonck*	6.287
Scheme for evaluating a local queue warning system, A. *H. Botma and H. L. Oei*	7.350
Single-level interchanges, or—splitting a signalised intersection. *A. S. Hakkert and Y. Ben-Yakov*	
Site evaluation of a Pelican crossing simulation model. *C. Cresswell, J. D. Griffiths and J. G. Hunt*	12.546
Some aspects of a typical signals design on main highways in Israel. *M. Tchelet*	8/8.386
Some effects on Flexible Working Hours. DTp Traffic Advisory Unit	1.39
Speed/flow relationships in road tunnels. *A. P. Bampfylde, G. J. D. Porter and S. D. Priest*	8/9.377
Start-up times and queue acceptance of large gaps at T-junctions. *C. B. Uber*	4.174
Surveying pedestrian traffic: results of the 'time-stamping' method used at Winnipeg Airport. *J. P. Braaksma*	6.274
Traffic attraction of West Midlands Hospitals, The. *H. R. Andrew and M. R. Harris*	7.331
Traffic data collection—an alternative method? *J. B. Garner and L. J. Mountain*	10.451
Traffic restraint in Singapore: 1. Measuring the effects of the Area Licence Scheme; and 2. Some design factors in traffic pricing schemes. *E. P. Holland and P. L. Watson*	1.14
Transport research at the University of Leeds: Report for 1977. *H. R. Kirby*	3.132
Transport research at the University of Newcastle upon Tyne Transport Operations Research Group: Report for 1977. *P. J. Hills*	3.138
Transport Studies Group, University College, London: Progress Report 1977. *R. E. Allsop*	2.69
Transportation planning in Berkshire—problems and policies. *M. J. Bright, M. G. Garratt and J. D. Kinder*	4.164
Trip rate characteristics of educational land uses. *C. LeFevre, F. E. Joyce and G. Parsons*	5.222
Tripoli home-interview household and travel survey, 1977, The. 1. An example of the use of machine-readable survey forms in transport planning. *P. J. B. Brown, J. A. Proudlove, A. Shembesh and A. D. Goddard*	10.438
2. Results from the survey, and contrasts with British travel patterns. *P. J. Brown, J. A. Proudlove and A. Shembesh*	11.509
Two models for allocating car parking spaces. *S. K. Goyal*	2.83
Urban Congestion Study 1976	12.572
West Yorkshire Transportation Studies: 1. The analytical approach. *B. V. Martin and P. N. Daly*	12.536
